Subject Index

P = Proceedings of the Anatomical Society of Great Britain and Ireland
(*dem*: Poster demonstration)

Abducens nerve, A light and electron microscope study of rat abducens nucleus neurons projecting to the cerebellar flocculus (Rodella, *et al.*) **186,** 357

Abductor pollicis brevis, Functional relationship between the abductor pollicis longus and abductor pollicis brevis muscles: an EMG analysis (van Oudenaarde & Oostendorp) **186,** 509

Abductor pollicis longus, Functional relationship between the abductor pollicis longus and abductor pollicis brevis muscles: an EMG analysis (van Oudenaarde & Oostendorp) **186,** 509

Aberrant spleen, Light and electron microscopy study of splenoportal milky spots in New Zealand Black mice: comparison between splenoportal milky spots and aberrant spleens (Takemori, *et al.*) **186,** 287

Acetylcholinesterase, Changes in density of brainstem afferents in ferret primary auditory cortex (AI) during postnatal development (Harper & Wallace) **186,** 373

Multiple origins of cerebellar cholinergic afferents from the lower brainstem in the gerbil (Lan, *et al.*) **186,** 549

Acid–base balance, Ultrastructural and immunocytochemical evidence for the presence of polarised plasma membrane H^+-ATPase in two specialised cell types in the chick embryo chorioallantoic membrane (Narbaitz, *et al.*) **186,** 245

Acid secretion, Ultrastructural and immunocytochemical evidence for the presence of polarised plasma membrane H^+-ATPase in two specialised cell types in the chick embryo chorioallantoic membrane (Narbaitz, *et al.*) **186,** 245

Age changes, Age-related variations in the horizontal and vertical diameters of the pedicles of the lumbar spine (Amonoo-Kuofi) **186,** 321

Age-related bone resorption in the normal incus: a case of maladaptive remodelling? (Lannigan, *et al.*) **186,** 651

Altitude, Star volumes of villi and intervillous pores in placentae from low and high altitude pregnancies (Lee & Mayhew) **186,** 349

Amniotic sac puncture, Teratogenic effects of amniotic sac puncture: a mouse model (MacIntyre, *et al.*) **186,** 527

Amoeboid microglia, Transient expression of transferrin receptors and localisation of iron in amoeboid microglia in postnatal rats (Kaur & Ling) **186,** 165

Amputation, The composition of trigeminal nerve branches in normal adult chickens and after debeaking at different ages (Dubbeldam, *et al.*) **186,** 619

Angiogenesis, A morphometric study of the expansion of the chick area vasculosa in shell-less culture (Ribatti) **186,** 639

Apes, The nerve supply to coracobrachialis in apes (Koizumi & Sakai) **186,** 395

Area vasculosa, A morphometric study of the expansion of the chick area vasculosa in shell-less culture (Ribatti) **186,** 639

Auditory cortex, Changes in density of brainstem afferents in ferret primary auditory cortex (AI) during postnatal development (Harper & Wallace) **186,** 373

Autoradiography, Muscle differentiation and morphogenesis in the regenerating tail of lizards (Alibardi) **186,** 143

Axial mesenchyme, Localisation of extracellular matrix components in the embryonic human notochord and axis mesenchyme (Götz, *et al.*) **186,** 111

Axon guidance, Does early monocular enucleation in a marsupial affect the surviving uncrossed retinofugal pathway? (Taylor & Guillery) **186,** 335

Axonal sprouting, Regenerative and other responses to injury in the retinal stump of the optic nerve in adult albino rats: transection of the intracranial optic nerve (Zeng, *et al.*) **186,** 495

Barrier antigen, Differential expression of an endothelial barrier antigen between the CNS and PNS (Lawrenson, *et al.*) **186,** 217

Basal lamina, Dual-channel laser scanning microscopy for the identification and quantification of proliferating skeletal muscle satellite cells following synergist ablation (Brotchie, *et al.*) **186,** 97

Basement membrane, Localisation of glycoproteins and glycosaminoglycans during early eye development in the macaque (Peterson, *et al.*) **186,** 31

Biomechanics, Functional anatomy of the head–neck movement system of quadrupedal and bipedal mammals (Graf, *et al.*) **186,** 55

Blood–brain barrier, Differential expression of an endothelial barrier antigen between the CNS and PNS (Lawrenson, *et al.*) **186,** 217

Blood–nerve barrier, Differential expression of an endothelial barrier antigen between the CNS and PNS (Lawrenson, *et al.*) **186,** 217

Bone, The timing of ossification of the limb bones, and growth rates of various long bones of the fore and hind limbs of the prenatal and early postnatal laboratory mouse (Patton & Kaufman) **186,** 175

Alterations to mandibular form following motor denervation of the masseter muscle. An experimental study in the rat (Carter & Harkness) **186,** 541

Cardiac myocytes, Ultrastructural features of left ventricular myocytes in active and torpid hamsters compared with rats: a morphometric study (Skepper & Navaratnam) **186,** 585

Cardiovascular shunt, Comparative anatomy of the cardiac foramen ovale in cats (Felidae), dogs (Canidae), bears (Ursidae) and hyaenas (Hyaenidae) (Macdonald & Johnstone) **186,** 235
Carnivores, Comparative anatomy of the cardiac foramen ovale in cats (Felidae), dogs (Canidae), bears (Ursidae) and hyaenas (Hyaenidae) (Macdonald & Johnstone) **186,** 235
Cartilaginous unicorn-like horn, Craniofacial abnormalities in homozygous *Small eye* (*Sey*/*Sey*) embryos and newborn mice (Kaufman, *et al.*) **186,** 607
CBA mouse, Morphometric analysis of myelinated fibre composition in the optic nerve of adult C57BL and CBA strain mice and (C57BL × CBA) F1 hybrid: a comparison of interstrain variation (Dangata, *et al.*) **186,** 343
Cell culture, Identification of heterogeneous cell populations in normal human intervertebral disc (Chelberg, *et al.*) **186,** 43
Cell differentiation, Granulated metrial gland cells in the uterine wall and placenta of the pregnant woodmouse, *Apodemus sylvaticus* (Stewart & Clarke) **186,** 411
Cell migration, Granulated metrial gland cells in the uterine wall and placenta of the pregnant woodmouse, *Apodemus sylvaticus* (Stewart & Clarke) **186,** 411
Cerebellar flocculus, A light and electron microscope study of rat abducens nucleus neurons projecting to the cerebellar flocculus (Rodella, *et al.*) **186,** 357
Cerebellum, Multiple origins of cerebellar cholinergic afferents from the lower brainstem in the gerbil (Lan, *et al.*) **186,** 549
Cerebral cortex, Changes in density of brainstem afferents in ferret primary auditory cortex (AI) during postnatal development (Harper & Wallace) **186,** 373
Cervical spine, Functional anatomy of the head–neck movement system of quadrupedal and bipedal mammals (Graf, *et al.*) **186,** 55
Chick embryo, Ultrastructural and immunocytochemical evidence for the presence of polarised plasma membrane H^+-ATPase in two specialised cell types in the chick embryo chorioallantoic membrane (Narbaitz, *et al.*) **186,** 245
Electron microscopy of the seminiferous epithelium in the triploid (ZZZ and ZZW) fowl, *Gallus domesticus* (Lin, *et al.*) **186,** 563
A morphometric study of the expansion of the chick area vasculosa in shell-less culture (Ribatti) **186,** 639
Chicken, The composition of trigeminal nerve branches in normal adult chickens and after debeaking at different ages (Dubbeldam, *et al.*) **186,** 619
Choline acetyltransferase, Multiple origins of cerebellar cholinergic afferents from the lower brainstem in the gerbil (Lan, *et al.*) **186,** 549
Cholinergic neurons, Multiple origins of cerebellar cholinergic afferents from the lower brainstem in the gerbil (Lan, *et al.*) **186,** 549
Chondroitin sulphate, Localisation of glycoproteins and glycosaminoglycans during early eye development in the macaque (Peterson, *et al.*) **186,** 31
Identification of heterogeneous cell populations in normal human intervertebral disc (Chelberg, *et al.*) **186,** 43
Chorioallantoic membrane, Ultrastructural and immunocytochemical evidence for the presence of polarised plasma membrane H^+-ATPase in two specialised cell types in the chick embryo chorioallantoic membrane (Narbaitz, *et al.*) **186,** 245
Cleft palate, Teratogenic effects of amniotic sac puncture: a mouse model (MacIntyre, *et al.*) **186,** 527
Collagen, Variations in the quantity of uncalcified fibrocartilage at the insertions of the extrinsic calf muscles in the foot (Frowen & Benjamin) **186,** 417
Collagen fibrils, Structure and composition of the outer connective tissue sheaths of peripheral nerve (Stolinski) **186,** 123
Disposition of collagen fibrils in human tendons (Stolinski) **186,** 577
Colour imaging, Colour thresholding in video imaging (Fermin & Degraw) **186,** 469
Colour thresholding, Colour thresholding in video imaging (Fermin & Degraw) **186,** 469
Computed tomography, Morphometry of the primate bony labyrinth: a new method based on high-resolution computed tomography (Spoor & Zonneveld) **186,** 271
Confocal microscopy, Temporal, 3-dimensional, cellular anatomy of corneal wound tissue (Jester, *et al.*) **186,** 301
Dual-channel laser scanning microscopy for the identification and quantification of proliferating skeletal muscle satellite cells following synergist ablation (Brotchie, *et al.*) **186,** 97
Coracobrachialis muscle, The nerve supply to coracobrachialis in apes (Koizumi & Sakai) **186,** 395
Coracoclavicular joint, Incidence of the coracoclavicular joint in South African populations (Nalla & Asvat) **186,** 645
Cranial abnormalities, Craniofacial abnormalities in homozygous *Small eye* (*Sey*/*Sey*) embryos and newborn mice (Kaufman, *et al.*) **186,** 607
Craniofacial phenotype, Craniofacial abnormalities in homozygous *Small eye* (*Sey*/*Sey*) embryos and newborn mice (Kaufman, *et al.*) **186,** 607

Decidua, Granulated metrial gland cells in the uterine wall and placenta of the pregnant woodmouse, *Apodemus sylvaticus* (Stewart & Clarke) **186,** 411
Decussation, Does early monocular enucleation in a marsupial affect the surviving uncrossed retinofugal pathway? (Taylor & Guillery) **186,** 335
Deglutition, Intrinsic fibre architecture and attachments of the human epiglottis and their contributions to the mechanism of deglutition (Vandaele, *et al.*) **186,** 1
Delayed palatogenesis, Craniofacial abnormalities in homozygous *Small eye* (*Sey*/*Sey*) embryos and newborn mice (Kaufman, *et al.*) **186,** 607
Craniofacial abnormalities in homozygous *Small eye* (*Sey*/*Sey*) embryos and newborn mice (Kaufman, *et al.*) **186,** 607
Dental innervation, Is rabbit dentine innervated? A fine-structural study of the pulpal innervation in the cheek teeth of the rabbit (Bishop) **186,** 365
Dentine, Is rabbit dentine innervated? A fine-structural study of the pulpal innervation in the cheek teeth of the rabbit (Bishop) **186,** 365
Diaphragmatic lymphatics, The role of the diaphragm in lymphatic absorption from the peritoneal cavity (Abu-Hijleh, *et al.*) **186,** 453
Diaphragmatic peritoneum, The role of the diaphragm in lymphatic absorption from the peritoneal cavity (Abu-Hijleh, *et al.*) **186,** 453
Didelphis albiventris, Anatomical study of the opossum (*Didelphis albiventris*) extraocular muscles (Matheus, *et al.*) **186,** 423
Dog, The morphology and innervation of the lateral pterygoid muscle of the dog (Tomo, *et al.*) **186,** 435
Lymph pathways of the medial retropharyngeal lymph node in dogs (Belz & Heath) **186,** 517
Dopamine, Changes in density of brainstem afferents in ferret primary auditory cortex (AI) during postnatal development (Harper & Wallace) **186,** 373
Dorsal root ganglion, Chemotropism in nerve regeneration studied in tissue culture (Gu, *et al.*) **186,** 153
Dwarf rats, Effects of growth hormone on intestinal morphology of genetically dwarf rats (Beer, *et al.*) **186,** 253
Dysraphism, Patterns of lectin binding during mammalian neurogenesis (Wilson & Wyatt) **186,** 209

Ear, Age-related bone resorption in the normal incus: a case of maladaptive remodelling? (Lannigan, *et al.*) **186,** 651
Elastic fibres, Structure and composition of the outer connective tissue sheaths of peripheral nerve (Stolinski) **186,** 123
Electromyography, Functional relationship between the abductor pollicis longus and abductor pollicis brevis muscles: an EMG analysis (van Oudenaarde & Oostendorp) **186,** 509
Endothelial cells, Differential expression of an endothelial barrier antigen between the CNS and PNS (Lawrenson, *et al.*) **186,** 217
Enteric nervous system, Ultrastructural localisation of substance P, vasoactive intestinal peptide and somatostatin immunoreactivities in the submucous plexus of guinea pig ileum (Wang, *et al.*) **186,** 187

Enthesis, Variations in the quantity of uncalcified fibrocartilage at the insertions of the extrinsic calf muscles in the foot (Frowen & Benjamin) **186,** 417
Epiglottis, Intrinsic fibre architecture and attachments of the human epiglottis and their contributions to the mechanism of deglutition (Vandaele, *et al.*) **186,** 1
Epineurium, Structure and composition of the outer connective tissue sheaths of peripheral nerve (Stolinski) **186,** 123
Epithelial–mesenchymal interactions, Localisation of extracellular matrix components in the embryonic human notochord and axis mesenchyme (Götz, *et al.*) **186,** 111
Euclidean distance matrix analysis, A three-dimensional evaluation of human facial asymmetry (Ferrario, *et al.*) **186,** 103
External ocular muscles, Anatomical study of the opossum (*Didelphis albiventris*) extraocular muscles (Matheus, *et al.*) **186,** 423
Extracellular matrix, Localisation of extracellular matrix components in the embryonic human notochord and axis mesenchyme (Götz, *et al.*) **186,** 111
Isolation and characterisation of a hyaluronan binding protein, hyaluronectin, from human placenta and its colocalisation with hyaluronan (Ponting & Kumar) **186,** 131
Localisation of glycoproteins and glycosaminoglycans during early eye development in the macaque (Peterson, *et al.*) **186,** 31
Extramedullary haematopoiesis, Light and electron microscopy study of splenoportal milky spots in New Zealand Black mice: comparison between splenoportal milky spots and aberrant spleens (Takemori, *et al.*) **186,** 287
Extraocular muscles, Anatomical study of the opossum (*Didelphis albiventris*) extraocular muscles (Matheus, *et al.*) **186,** 423
Eye, Does early monocular enucleation in a marsupial affect the surviving uncrossed retinofugal pathway? (Taylor & Guillery) **186,** 335
Eye development, Localisation of glycoproteins and glycosaminoglycans during early eye development in the macaque (Peterson, *et al.*) **186,** 31

F1 hybrids, Morphometric analysis of myelinated fibre composition in the optic nerve of adult C57BL and CBA strain mice and (C57BL × CBA) F1 hybrid: a comparison of interstrain variation (Dangata, *et al.*) **186,** 343
Face, A three-dimensional evaluation of human facial asymmetry (Ferrario, *et al.*) **186,** 103
Factin, Temporal, 3-dimensional, cellular anatomy of corneal wound tissue (Jester, *et al.*) **186,** 301
Ferret, Changes in density of brainstem afferents in ferret primary auditory cortex (AI) during postnatal development (Harper & Wallace) **186,** 373
Fetal alcohol syndrome, Optic nerve hypoplasia in the fetal alcohol syndrome: a mouse model (Parson, *et al.*) **186,** 313
Fetus, Comparative anatomy of the cardiac foramen ovale in cats (Felidae), dogs (Canidae), bears (Ursidae) and hyaenas (Hyaenidae) (Macdonald & Johnstone) **186,** 235
The renal veins in the human cadaveric fetus: their importance as contributors to collateral flow (Satyapal & Kalideen) **186,** 405
Fibroblast, Temporal, 3-dimensional, cellular anatomy of corneal wound tissue (Jester, *et al.*) **186,** 301
Fibrocartilage, Variations in the quantity of uncalcified fibrocartilage at the insertions of the extrinsic calf muscles in the foot (Frowen & Benjamin) **186,** 417
Fibrosis, Temporal, 3-dimensional, cellular anatomy of corneal wound tissue (Jester, *et al.*) **186,** 301
Fluorescent in situ hybridisation, Colour thresholding in video imaging (Fermin & Degraw) **186,** 469
Foot, Variations in the quantity of uncalcified fibrocartilage at the insertions of the extrinsic calf muscles in the foot (Frowen & Benjamin) **186,** 417
Form analysis, A three-dimensional evaluation of human facial asymmetry (Ferrario, *et al.*) **186,** 103
Fowl, Electron microscopy of the seminiferous epithelium in the triploid (ZZZ and ZZW) fowl, *Gallus domesticus* (Lin, *et al.*) **186,** 563

Gamete formation, Electron microscopy of the seminiferous epithelium in the triploid (ZZZ and ZZW) fowl, *Gallus domesticus* (Lin, *et al.*) **186,** 563
Gerbil, Multiple origins of cerebellar cholinergic afferents from the lower brainstem in the gerbil (Lan, *et al.*) **186,** 549
Glenoid cavity, Does the area of the glenoid cavity of the scapula show sexual dimorphism? (Prescher & Klümpen) **186,** 223
Granulated metrial gland cells, Granulated metrial gland cells in the uterine wall and placenta of the pregnant woodmouse, *Apodemus sylvaticus* (Stewart & Clarke) **186,** 411
Growth, The timing of ossification of the limb bones, and growth rates of various long bones of the fore and hind limbs of the prenatal and early postnatal laboratory mouse (Patton & Kaufman) **186,** 175
Growth factors, The distribution of PDGFs and PDGF receptors during murine secondary palate development (Qiu & Ferguson) **186,** 17
The effect of suramin on healing adult rodent dermal wounds (Chamberlain, *et al.*) **186,** 87
Growth hormone, Effects of growth hormone on intestinal morphology of genetically dwarf rats (Beer, *et al.*) **186,** 253
Guinea pig, Ultrastructural localisation of substance P, vasoactive intestinal peptide and somatostatin immunoreactivities in the submucous plexus of guinea pig ileum (Wang, *et al.*) **186,** 187
Comparative anatomical studies on the thyroid and thymic arteries. III. Guinea pig (*Cavia cobaya*) (Yamasaki) **186,** 383

Hamster, Ultrastructural features of left ventricular myocytes in active and torpid hamsters compared with rats: a morphometric study (Skepper & Navaratnam) **186,** 585
Hand function, Functional relationship between the abductor pollicis longus and abductor pollicis brevis muscles: an EMG analysis (van Oudenaarde & Oostendorp) **186,** 509
Heart, Comparative anatomy of the cardiac foramen ovale in cats (Felidae), dogs (Canidae), bears (Ursidae) and hyaenas (Hyaenidae) (Macdonald & Johnstone) **186,** 235
Comparative anatomy of the cardiac foramen ovale in cats (Felidae), dogs (Canidae), bears (Ursidae) and hyaenas (Hyaenidae) (Macdonald & Johnstone) **186,** 235
Ultrastructural features of left ventricular myocytes in active and torpid hamsters compared with rats: a morphometric study (Skepper & Navaratnam) **186,** 585
Hereditary demyelinating neuropathies, Molecular anatomy and genetics of myelin proteins in the peripheral nervous system (Snipes & Suter) **186,** 483
Hibernation, Ultrastructural features of left ventricular myocytes in active and torpid hamsters compared with rats: a morphometric study (Skepper & Navaratnam) **186,** 585
Human annulus fibrosus, Identification of heterogeneous cell populations in normal human intervertebral disc (Chelberg, *et al.*) **186,** 43
Hyaluronan, Isolation and characterisation of a hyaluronan binding protein, hyaluronectin, from human placenta and its colocalisation with hyaluronan (Ponting & Kumar) **186,** 131
Hyaluronectin, Isolation and characterisation of a hyaluronan binding protein, hyaluronectin, from human placenta and its colocalisation with hyaluronan (Ponting & Kumar) **186,** 131
Hyaluronic acid, Localisation of glycoproteins and glycosaminoglycans during early eye development in the macaque (Peterson, *et al.*) **186,** 31
Hyoepiglottic ligaments, Intrinsic fibre architecture and attachments of the human epiglottis and their contributions to the mechanism of deglutition (Vandaele, *et al.*) **186,** 1
Hypertension, A comparative study by retrograde neuronal tracing and substance P immunohistochemistry of sympathetic preganglionic neurons in spontaneous hypertensive rats and Wistar–Kyoto rats (Tang, *et al.*) **186,** 197

Ileum, Ultrastructural localisation of substance P, vasoactive intestinal peptide and somatostatin immunoreactivities in the submucous plexus of guinea pig ileum (Wang, *et al.*) **186,** 187
Immunocytochemistry, Differential expression of an endothelial barrier antigen between the CNS and PNS (Lawrenson, *et al.*) **186,** 217
Incisor teeth, Craniofacial abnormalities in homozygous *Small eye* (*Sey*/*Sey*) embryos and newborn mice (Kaufman, *et al.*) **186,** 607
Incus, Age-related bone resorption in the normal incus: a case of maladaptive remodelling? (Lannigan, *et al.*) **186,** 651
Inner ear, Morphometry of the primate bony labyrinth: a new method based on high-resolution computed tomography (Spoor & Zonneveld) **186,** 271
Intervillous space, Star volumes of villi and intervillous pores in placentae from low and high altitude pregnancies (Lee & Mayhew) **186,** 349
Intestine, Effects of growth hormone on intestinal morphology of genetically dwarf rats (Beer, *et al.*) **186,** 253
Iron, Transient expression of transferrin receptors and localisation of iron in amoeboid microglia in postnatal rats (Kaur & Ling) **186,** 165
Islets of Langerhans, An immunocytochemical and morphometric study of the rat pancreatic islets (Elayat, *et al.*) **186,** 629

Joints, Incidence of the coracoclavicular joint in South African populations (Nalla & Asvat) **186,** 645

Keratan sulphate, Identification of heterogeneous cell populations in normal human intervertebral disc (Chelberg, *et al.*) **186,** 43
Kidney, Classification of the drainage patterns of the renal veins (Satyapal) **186,** 329
Classification of the drainage patterns of the renal veins (Satyapal) **186,** 329

Labyrinth, Morphometry of the primate bony labyrinth: a new method based on high-resolution computed tomography (Spoor & Zonneveld) **186,** 271
Laminin, Dual-channel laser scanning microscopy for the identification and quantification of proliferating skeletal muscle satellite cells following synergist ablation (Brotchie, *et al.*) **186,** 97
Larynx, Intrinsic fibre architecture and attachments of the human epiglottis and their contributions to the mechanism of deglutition (Vandaele, *et al.*) **186,** 1
Lateral pterygoid muscle, The morphology and innervation of the lateral pterygoid muscle of the dog (Tomo, *et al.*) **186,** 435
Lectins, Patterns of lectin binding during mammalian neurogenesis (Wilson & Wyatt) **186,** 209
Limb abnormalities, Teratogenic effects of amniotic sac puncture: a mouse model (MacIntyre, *et al.*) **186,** 527
Lizard, Muscle differentiation and morphogenesis in the regenerating tail of lizards (Alibardi) **186,** 143
Loop-tail mouse, Patterns of lectin binding during mammalian neurogenesis (Wilson & Wyatt) **186,** 209
Lumbar pedicles, Age-related variations in the horizontal and vertical diameters of the pedicles of the lumbar spine (Amonoo-Kuofi) **186,** 321
Lumbar spine, Age-related variations in the horizontal and vertical diameters of the pedicles of the lumbar spine (Amonoo-Kuofi) **186,** 321
Lymph nodes, Lymph pathways of the medial retropharyngeal lymph node in dogs (Belz & Heath) **186,** 517
Lymphatic system, Lymph pathways of the medial retropharyngeal lymph node in dogs (Belz & Heath) **186,** 517
Lymphatic vessels, Ultrastructural localisation of substance P, vasoactive intestinal peptide and somatostatin immunoreactivities in the submucous plexus of guinea pig ileum (Wang, *et al.*) **186,** 187

Macaca fascicularis, Localisation of glycoproteins and glycosaminoglycans during early eye development in the macaque (Peterson, *et al.*) **186,** 31
Macaque embryo, Localisation of glycoproteins and glycosaminoglycans during early eye development in the macaque (Peterson, *et al.*) **186,** 31
Mandible, Alterations to mandibular form following motor denervation of the masseter muscle. An experimental study in the rat (Carter & Harkness) **186,** 541
Mandibular nerve, The morphology and innervation of the lateral pterygoid muscle of the dog (Tomo, *et al.*) **186,** 435
Marsupial anatomy, Anatomical study of the opossum (*Didelphis albiventris*) extraocular muscles (Matheus, *et al.*) **186,** 423
Marsupials, Does early monocular enucleation in a marsupial affect the surviving uncrossed retinofugal pathway? (Taylor & Guillery) **186,** 335
Medial retropharyngeal lymph node, Lymph pathways of the medial retropharyngeal lymph node in dogs (Belz & Heath) **186,** 517
Median nerve, Distribution patterns of the muscle branch of the median nerve in the thenar region (Olave, *et al.*) **186,** 441
Meiosis, Electron microscopy of the seminiferous epithelium in the triploid (ZZZ and ZZW) fowl, *Gallus domesticus* (Lin, *et al.*) **186,** 563
Meissner corpuscles, Three-dimensional reconstruction of the Meissner corpuscle of man, after silver impregnation and immunofluorescence with PGP 9·5 antibodies using confocal scanning laser microscopy (Castano, *et al.*) **186,** 261
Mesothelial stomata, The role of the diaphragm in lymphatic absorption from the peritoneal cavity (Abu-Hijleh, *et al.*) **186,** 453
Mice, Craniofacial abnormalities in homozygous *Small eye* (*Sey*/*Sey*) embryos and newborn mice (Kaufman, *et al.*) **186,** 607
Milky spot, Light and electron microscopy study of splenoportal milky spots in New Zealand Black mice: comparison between splenoportal milky spots and aberrant spleens (Takemori, *et al.*) **186,** 287
Molars, Is rabbit dentine innervated? A fine-structural study of the pulpal innervation in the cheek teeth of the rabbit (Bishop) **186,** 365
Monkey, Localisation of glycoproteins and glycosaminoglycans during early eye development in the macaque (Peterson, *et al.*) **186,** 31
Monoclonal antibody, Transient expression of transferrin receptors and localisation of iron in amoeboid microglia in postnatal rats (Kaur & Ling) **186,** 165
Monodelphis domestica, Does early monocular enucleation in a marsupial affect the surviving uncrossed retinofugal pathway? (Taylor & Guillery) **186,** 335
Morphometric analysis, Optic nerve hypoplasia in the fetal alcohol syndrome: a mouse model (Parson, *et al.*) **186,** 313
Morphometry, Morphometry of the primate bony labyrinth: a new method based on high-resolution computed tomography (Spoor & Zonneveld) **186,** 271
Mouse, The distribution of PDGFs and PDGF receptors during murine secondary palate development (Qiu & Ferguson) **186,** 17
The timing of ossification of the limb bones, and growth rates of various long bones of the fore and hind limbs of the prenatal and early postnatal laboratory mouse (Patton & Kaufman) **186,** 175
Patterns of lectin binding during mammalian neurogenesis (Wilson & Wyatt) **186,** 209
Light and electron microscopy study of splenoportal milky spots in New Zealand Black mice: comparison between splenoportal milky spots and aberrant spleens (Takemori, *et al.*) **186,** 287
Optic nerve hypoplasia in the fetal alcohol syndrome: a mouse model (Parson, *et al.*) **186,** 313
Morphometric analysis of myelinated fibre composition in the optic nerve of adult C57BL and CBA strain mice and (C57BL × CBA) F1 hybrid: a comparison of interstrain variation (Dangata, *et al.*) **186,** 343
Teratogenic effects of amniotic sac puncture: a mouse model (MacIntyre, *et al.*) **186,** 527

Muscle fibrosis, Natural involution of muscle in the proximal sesamoidean ligament in sheep (Mascarello & Rowlerson) **186,** 75
Muscle innervation, Distribution patterns of the muscle branch of the median nerve in the thenar region (Olave, *et al.*) **186,** 441
Muscle involution, Natural involution of muscle in the proximal sesamoidean ligament in sheep (Mascarello & Rowlerson) **186,** 75
Muscle regeneration, Muscle differentiation and morphogenesis in the regenerating tail of lizards (Alibardi) **186,** 143
Muscle, skeletal, Natural involution of muscle in the proximal sesamoidean ligament in sheep (Mascarello & Rowlerson) **186,** 75
Myelin proteins, Molecular anatomy and genetics of myelin proteins in the peripheral nervous system (Snipes & Suter) **186,** 483
Myofibroblast, Temporal, 3-dimensional, cellular anatomy of corneal wound tissue (Jester, *et al.*) **186,** 301
Myogenesis, Muscle differentiation and morphogenesis in the regenerating tail of lizards (Alibardi) **186,** 143
Myosin, Natural involution of muscle in the proximal sesamoidean ligament in sheep (Mascarello & Rowlerson) **186,** 75

Nerve fibre calibre, The composition of trigeminal nerve branches in normal adult chickens and after debeaking at different ages (Dubbeldam, *et al.*) **186,** 619
Nerve growth factor, The effect of NGF depletion on the neurotropic influence exerted by the distal stump following nerve transection (Doubleday & Robinson) **186,** 593
Nerve regeneration, Chemotropism in nerve regeneration studied in tissue culture (Gu, *et al.*) **186,** 153. The effect of NGF depletion on the neurotropic influence exerted by the distal stump following nerve transection (Doubleday & Robinson) **186,** 593
Neural tube closure, Patterns of lectin binding during mammalian neurogenesis (Wilson & Wyatt) **186,** 209
Neuroepithelium, Patterns of lectin binding during mammalian neurogenesis (Wilson & Wyatt) **186,** 209
Neuropeptides, Ultrastructural localisation of substance P, vasoactive intestinal peptide and somatostatin immunoreactivities in the submucous plexus of guinea pig ileum (Wang, *et al.*) **186,** 187
Neurotrophic factors, Optic nerve hypoplasia in the fetal alcohol syndrome: a mouse model (Parson, *et al.*) **186,** 313
Neurotropism, Chemotropism in nerve regeneration studied in tissue culture (Ga, *et al.*) **186,** 153. The effect of NGF depletion on the neurotropic influence exerted by the distal stump following nerve transection (Doubleday & Robinson) **186,** 593
Nociception, The composition of trigeminal nerve branches in normal adult chickens and after debeaking at different ages (Dubbeldam, *et al.*) **186,** 619
Noradrenaline, Changes in density of brainstem afferents in ferret primary auditory cortex (AI) during postnatal development (Harper & Wallace) **186,** 373
Notochord, Localisation of extracellular matrix components in the embryonic human notochord and axis mesenchyme (Götz, *et al.*) **186,** 111
Nucleus pulposus, Identification of heterogeneous cell populations in normal human intervertebral disc (Chelberg, *et al.*) **186,** 43

Objective quantification, Colour thresholding in video imaging (Fermin & Degraw) **186,** 469
Ocular cup, Localisation of glycoproteins and glycosaminoglycans during early eye development in the macaque (Peterson, *et al.*) **186,** 31
Ocular lens, Localisation of glycoproteins and glycosaminoglycans during early eye development in the macaque (Peterson, *et al.*) **186,** 31
Opossum, Anatomical study of the opossum (*Didelphis albiventris*) extraocular muscles (Matheus, *et al.*) **186,** 423
Optic nerve, Differential expression of an endothelial barrier antigen between the CNS and PNS (Lawrenson, *et al.*) **186,** 217
Optic nerve hypoplasia in the fetal alcohol syndrome: a mouse model (Parson, *et al.*) **186,** 313
Morphometric analysis of myelinated fibre composition in the optic nerve of adult C57BL and CBA strain mice and (C57BL × CBA) F1 hybrid: a comparison of interstrain variation (Dangata, *et al.*) **186,** 343
Regenerative and other responses to injury in the retinal stump of the optic nerve in adult albino rats: transection of the intracranial optic nerve (Zeng, *et al.*) **186,** 495
Optic nerve hypoplasia, Optic nerve hypoplasia in the fetal alcohol syndrome: a mouse model (Parson, *et al.*) **186,** 313
Optic nerve injury, Regenerative and other responses to injury in the retinal stump of the optic nerve in adult albino rats: transection of the intracranial optic nerve (Zeng, *et al.*) **186,** 495
Ossification, The timing of ossification of the limb bones, and growth rates of various long bones of the fore and hind limbs of the prenatal and early postnatal laboratory mouse (Patton & Kaufman) **186,** 175

Palatogenesis, The distribution of PDGFs and PDGF receptors during murine secondary palate development (Qiu & Ferguson) **186,** 17
Craniofacial abnormalities in homozygous *Small eye* (*Sey*/*Sey*) embryos and newborn mice (Kaufman, *et al.*) **186,** 607
Pancreas, An immunocytochemical and morphometric study of the rat pancreatic islets (Elayat, *et al.*) **186,** 629
PDGF α-receptor, The distribution of PDGFs and PDGF receptors during murine secondary palate development (Qiu & Ferguson) **186,** 17
PDGF β-receptor, The distribution of PDGFs and PDGF receptors during murine secondary palate development (Qiu & Ferguson) **186,** 17
PDGF-AA isoform, The distribution of PDGFs and PDGF receptors during murine secondary palate development (Qiu & Ferguson) **186,** 17
PDGF-BB isoform, The distribution of PDGFs and PDGF receptors during murine secondary palate development (Qiu & Ferguson) **186,** 17
Perineurium, Structure and composition of the outer connective tissue sheaths of peripheral nerve (Stolinski) **186,** 123
Peripheral nerve, Is rabbit dentine innervated? A fine-structural study of the pulpal innervation in the cheek teeth of the rabbit (Bishop) **186,** 365
The nerve supply to coracobrachialis in apes (Koizumi & Sakai) **186,** 395
The morphology and innervation of the lateral pterygoid muscle of the dog (Tomo, *et al.*) **186,** 435
Distribution patterns of the muscle branch of the median nerve in the thenar region (Olave, *et al.*) **186,** 441
Molecular anatomy and genetics of myelin proteins in the peripheral nervous system (Snipes & Suter) **186,** 483
The effect of NGF depletion on the neurotropic influence exerted by the distal stump following nerve transection (Doubleday & Robinson) **186,** 593
Peritoneal absorption, The role of the diaphragm in lymphatic absorption from the peritoneal cavity (Abu-Hijleh, *et al.*) **186,** 453
Phenotype, Identification of heterogeneous cell populations in normal human intervertebral disc (Chelberg, *et al.*) **186,** 43
Placenta, Isolation and characterisation of a hyaluronan binding protein, hyaluronectin, from human placenta and its colocalisation with hyaluronan (Ponting & Kumar) **186,** 131
Star volumes of villi and intervillous pores in placentae from low and high altitude pregnancies (Lee & Mayhew) **186,** 349
Granulated metrial gland cells in the uterine wall and placenta of the pregnant woodmouse, *Apodemus sylvaticus* (Stewart & Clarke) **186,** 411

Population variation, Incidence of the coracoclavicular joint in South African populations (Nalla & Asvat) **186,** 645
Postural deformities, Teratogenic effects of amniotic sac puncture: a mouse model (MacIntyre, *et al.*) **186,** 527
Posture, Functional anatomy of the head–neck movement system of quadrupedal and bipedal mammals (Graf, *et al.*) **186,** 55
Pregnancy, Star volumes of villi and intervillous pores in placentae from low and high altitude pregnancies (Lee & Mayhew) **186,** 349
Primates, Morphometry of the primate bony labyrinth: a new method based on high-resolution computed tomography (Spoor & Zonneveld) **186,** 271
The nerve supply to coracobrachialis in apes (Koizumi & Sakai) **186,** 395
Protein gene product 9·5, Three-dimensional reconstruction of the Meissner corpuscle of man, after silver impregnation and immunofluorescence with PGP 9·5 antibodies using confocal scanning laser microscopy (Castano, *et al.*) **186,** 261
Proton, Ultrastructural and immunocytochemical evidence for the presence of polarised plasma membrane H^+-ATPase in two specialised cell types in the chick embryo chorioallantoic membrane (Narbaitz, *et al.*) **186,** 245
Proton ATPase, Ultrastructural and immunocytochemical evidence for the presence of polarised plasma membrane H^+-ATPase in two specialised cell types in the chick embryo chorioallantoic membrane (Narbaitz, *et al.*) **186,** 245
Proton secreting cells, Ultrastructural and immunocytochemical evidence for the presence of polarised plasma membrane H^+-ATPase in two specialised cell types in the chick embryo chorioallantoic membrane (Narbaitz, *et al.*) **186,** 245
Pulp, Is rabbit dentine innervated? A fine-structural study of the pulpal innervation in the cheek teeth of the rabbit (Bishop) **186,** 365

Rabbit, Temporal, 3-dimensional, cellular anatomy of corneal wound tissue (Jester, *et al.*) **186,** 301
Is rabbit dentine innervated? A fine-structural study of the pulpal innervation in the cheek teeth of the rabbit (Bishop) **186,** 365
Rat, Structure and composition of the outer connective tissue sheaths of peripheral nerve (Stolinski) **186,** 123
Chemotropism in nerve regeneration studied in tissue culture (Gu, *et al.*) **186,** 153
Transient expression of transferrin receptors and localisation of iron in amoeboid microglia in postnatal rats (Kaur & Ling) **186,** 165
A comparative study by retrograde neuronal tracing and substance P immunohistochemistry of sympathetic preganglionic neurons in spontaneous hypertensive rats and Wistar–Kyoto rats (Tang, *et al.*) **186,** 197
Effects of growth hormone on intestinal morphology of genetically dwarf rats (Beer, *et al.*) **186,** 253
A light and electron microscope study of rat abducens nucleus neurons projecting to the cerebellar flocculus (Rodella, *et al.*) **186,** 357
Alterations to mandibular form following motor denervation of the masseter muscle. An experimental study in the rat (Carter & Harkness) **186,** 541
Ultrastructural features of left ventricular myocytes in active and torpid hamsters compared with rats: a morphometric study (Skepper & Navaratnam) **186,** 585
An immunocytochemical and morphometric study of the rat pancreatic islets (Elayat, *et al.*) **186,** 629
The effect of suramin on healing adult rodent dermal wounds (Chamberlain, *et al.*) **186,** 87
Dual-channel laser scanning microscopy for the identification and quantification of proliferating skeletal muscle satellite cells following synergist ablation (Brotchie, *et al.*) **186,** 97
Regenerating tail, Muscle differentiation and morphogenesis in the regenerating tail of lizards (Alibardi) **186,** 143
Regeneration, Regenerative and other responses to injury in the retinal stump of the optic nerve in adult albino rats: transection of the intracranial optic nerve (Zeng, *et al.*) **186,** 495
Renal vein, The renal veins in the human cadaveric fetus: their importance as contributors to collateral flow (Satyapal & Kalideen) **186,** 405
Renal veins, Classification of the drainage patterns of the renal veins (Satyapal) **186,** 329
Retinal ganglion cells, Regenerative and other responses to injury in the retinal stump of the optic nerve in adult albino rats: transection of the intracranial optic nerve (Zeng, *et al.*) **186,** 495
Rotator cuff tears, Morphology of the torn rotator cuff (Itoi, *et al.*) **186,** 429

Satellite cells, Dual-channel laser scanning microscopy for the identification and quantification of proliferating skeletal muscle satellite cells following synergist ablation (Brotchie, *et al.*) **186,** 97
Scapula, Does the area of the glenoid cavity of the scapula show sexual dimorphism? (Prescher & Klümpen) **186,** 223
Sciatic nerve, Differential expression of an endothelial barrier antigen between the CNS and PNS (Lawrenson, *et al.*) **186,** 217
Seminiferous epithelium, Electron microscopy of the seminiferous epithelium in the triploid (ZZZ and ZZW) fowl, *Gallus domesticus* (Lin, *et al.*) **186,** 563
Serotonin, Changes in density of brainstem afferents in ferret primary auditory cortex (AI) during postnatal development (Harper & Wallace) **186,** 373
Sexual dimorphism, Does the area of the glenoid cavity of the scapula show sexual dimorphism? (Prescher & Klümpen) **186,** 223
Sheep, Natural involution of muscle in the proximal sesamoidean ligament in sheep (Mascarello & Rowlerson) **186,** 75
Shoulder, Morphology of the torn rotator cuff (Itoi, *et al.*) **186,** 429
Skeletal muscle, The nerve supply to coracobrachialis in apes (Koizumi & Sakai) **186,** 395
The morphology and innervation of the lateral pterygoid muscle of the dog (Tomo, *et al.*) **186,** 435
Functional relationship between the abductor pollicis longus and abductor pollicis brevis muscles: an EMG analysis (van Oudenaarde & Oostendorp) **186,** 509
Alterations to mandibular form following motor denervation of the masseter muscle. An experimental study in the rat (Carter & Harkness) **186,** 541
Dual-channel laser scanning microscopy for the identification and quantification of proliferating skeletal muscle satellite cells following synergist ablation (Brotchie, *et al.*) **186,** 97
Skin, The effect of suramin on healing adult rodent dermal wounds (Chamberlain, *et al.*) **186,** 87
Skull, Functional anatomy of the head–neck movement system of quadrupedal and bipedal mammals (Graf, *et al.*) **186,** 55
***Small eye (Sey)* mutation**, Craniofacial abnormalities in homozygous *Small eye* (*Sey/Sey*) embryos and newborn mice (Kaufman, *et al.*) **186,** 607
Somatostatin, Ultrastructural localisation of substance P, vasoactive intestinal peptide and somatostatin immunoreactivities in the submucous plexus of guinea pig ileum (Wang, *et al.*) **186,** 187
South American opossum, Anatomical study of the opossum (*Didelphis albiventris*) extraocular muscles (Matheus, *et al.*) **186,** 423
Spermatogenesis, Electron microscopy of the seminiferous epithelium in the triploid (ZZZ and ZZW) fowl, *Gallus domesticus* (Lin, *et al.*) **186,** 563
Spermiogenesis, Electron microscopy of the seminiferous epithelium in the triploid (ZZZ and ZZW) fowl, *Gallus domesticus* (Lin, *et al.*) **186,** 563
Spine, Age-related variations in the horizontal and vertical diameters of the pedicles of the lumbar spine (Amonoo-Kuofi) **186,** 321
Star volumes, Star volumes of villi and intervillous pores in placentae from low and high altitude pregnancies (Lee & Mayhew) **186,** 349

Submucous plexus, Ultrastructural localisation of substance P, vasoactive intestinal peptide and somatostatin immunoreactivities in the submucous plexus of guinea pig ileum (Wang, *et al.*) **186,** 187
Substance P, Ultrastructural localisation of substance P, vasoactive intestinal peptide and somatostatin immunoreactivities in the submucous plexus of guinea pig ileum (Wang, *et al.*) **186,** 187
A comparative study by retrograde neuronal tracing and substance P immunohistochemistry of sympathetic preganglionic neurons in spontaneous hypertensive rats and Wistar–Kyoto rats (Tang, *et al.*) **186,** 197
Superior cervical ganglion, A comparative study by retrograde neuronal tracing and substance P immunohistochemistry of sympathetic preganglionic neurons in spontaneous hypertensive rats and Wistar–Kyoto rats (Tang, *et al.*) **186,** 197
Supernumerary upper incisor teeth, Craniofacial abnormalities in homozygous *Small eye* (*Sey*/*Sey*) embryos and newborn mice (Kaufman, *et al.*) **186,** 607
Suramin, The effect of suramin on healing adult rodent dermal wounds (Chamberlain, *et al.*) **186,** 87
Sympathetic preganglionic neurons, A comparative study by retrograde neuronal tracing and substance P immunohistochemistry of sympathetic preganglionic neurons in spontaneous hypertensive rats and Wistar–Kyoto rats (Tang, *et al.*) **186,** 197
Synergist ablation, Dual-channel laser scanning microscopy for the identification and quantification of proliferating skeletal muscle satellite cells following synergist ablation (Brotchie, *et al.*) **186,** 97

Tail abnormalities, Teratogenic effects of amniotic sac puncture: a mouse model (MacIntyre, *et al.*) **186,** 527
Tail autotomy, Muscle differentiation and morphogenesis in the regenerating tail of lizards (Alibardi) **186,** 143
Tamarin monkey, Structure and composition of the outer connective tissue sheaths of peripheral nerve (Stolinski) **186,** 123
Teeth, Is rabbit dentine innervated? A fine-structural study of the pulpal innervation in the cheek teeth of the rabbit (Bishop) **186,** 365
Craniofacial abnormalities in homozygous *Small eye* (*Sey*/*Sey*) embryos and newborn mice (Kaufman, *et al.*) **186,** 607
Temporal crescent, Does early monocular enucleation in a marsupial affect the surviving uncrossed retinofugal pathway? (Taylor & Guillery) **186,** 335
Temporomandibular joint, The morphology and innervation of the lateral pterygoid muscle of the dog (Tomo, *et al.*) **186,** 435
Tendon, Variations in the quantity of uncalcified fibrocartilage at the insertions of the extrinsic calf muscles in the foot (Frowen & Benjamin) **186,** 417
Disposition of collagen fibrils in human tendons (Stolinski) **186,** 577
Tendon rupture, Morphology of the torn rotator cuff (Itoi, *et al.*) **186,** 429
Thenar muscles, Distribution patterns of the muscle branch of the median nerve in the thenar region (Olave, *et al.*) **186,** 441
Thymus, Comparative anatomical studies on the thyroid and thymic arteries. III. Guinea pig (*Cavia cobaya*) (Yamasaki) **186,** 383
Thyroid gland, Comparative anatomical studies on the thyroid and thymic arteries. III. Guinea pig (*Cavia cobaya*) (Yamasaki) **186,** 383
Transferrin receptor, Transient expression of transferrin receptors and localisation of iron in amoeboid microglia in postnatal rats (Kaur & Ling) **186,** 165
Transforming growth factor β, Localisation of extracellular matrix components in the embryonic human notochord and axis mesenchyme (Götz, *et al.*) **186,** 111
Trapezium, Functional relationship between the abductor pollicis longus and abductor pollicis brevis muscles: an EMG analysis (van Oudenaarde & Oostendorp) **186,** 509
Trigeminal nerve, The composition of trigeminal nerve branches in normal adult chickens and after debeaking at different ages (Dubbeldam, *et al.*) **186,** 619
Triploidy, Electron microscopy of the seminiferous epithelium in the triploid (ZZZ and ZZW) fowl, *Gallus domesticus* (Lin, *et al.*) **186,** 563
Types I and II collagen, Identification of heterogeneous cell populations in normal human intervertebral disc (Chelberg, *et al.*) **186,** 43

Vasculature, Classification of the drainage patterns of the renal veins (Satyapal) **186,** 329
Comparative anatomical studies on the thyroid and thymic arteries. III. Guinea pig (*Cavia cobaya*) (Yamasaki) **186,** 383
Vasculogenesis, A morphometric study of the expansion of the chick area vasculosa in shell-less culture (Ribatti) **186,** 639
Vasoactive intestinal peptide, Ultrastructural localisation of substance P, vasoactive intestinal peptide and somatostatin immunoreactivities in the submucous plexus of guinea pig ileum (Wang, *et al.*) **186,** 187
Venous collaterals, The renal veins in the human cadaveric fetus: their importance as contributors to collateral flow (Satyapal & Kalideen) **186,** 405
Vertebral neural arch pedicles, Age-related variations in the horizontal and vertical diameters of the pedicles of the lumbar spine (Amonoo-Kuofi) **186,** 321
Vertebrate, Functional anatomy of the head–neck movement system of quadrupedal and bipedal mammals (Graf, *et al.*) **186,** 55
Video microscopy, Colour thresholding in video imaging (Fermin & Degraw) **186,** 469
Villi, Star volumes of villi and intervillous pores in placentae from low and high altitude pregnancies (Lee & Mayhew) **186,** 349
Visual system, Does early monocular enucleation in a marsupial affect the surviving uncrossed retinofugal pathway? (Taylor & Guillery) **186,** 335

Woodmouse, Granulated metrial gland cells in the uterine wall and placenta of the pregnant woodmouse, *Apodemus sylvaticus* (Stewart & Clarke) **186,** 411
Wound healing, The effect of suramin on healing adult rodent dermal wounds (Chamberlain, *et al.*) **186,** 87
